## Party Planner Guide

### Table Wines, Champagnes, Sparkling Wines (Number of 5 oz. wine servings)

Bottles	1	2	4	6	8	10	12	S e r v i n g s
750 ml (25.4 oz.)	5	10	20	30	40	51	61	
Liter (33.8 oz.)	6	13	27	40	54	67	81	
1.5 L (50.4 oz.)	10	20	40	60	80	101	122	
3 Liter (101 oz.)	20	40	81	121	161	202	242	
4 Liter (135 oz.)	27	54	108	162	216	270	324	

### How Many Bottles of Wine do I need for Dinner Table Wines, Champagnes, Sparkling Wines (Average 2 servings at 4 to 5 oz. per serving)

People	4	6	8	10	12	20
750 ml (25.4 oz.)	2	2+	3+	4	5	8
1.5 L (50.7 oz.)	1	1+	2	2	2+	4

### How much do I serve for a 3 hour gathering?

**Wine** - Generally, for a dinner party, allow 1.5 glasses per person for the first hour and 1 glass per person for the second hour. The last hour you could serve coffee and dessert.

Wine has 750 ml which is 25.4 oz. This would be 5 servings per bottle.

**Liquor** - For cocktails allow 1.5 glasses per person per hour. If you had 5 bottles of 750 ml liquor, then this would provide approximately 83 mixed drinks (based on 1.5 oz. of liquor per drink), which would provide consumption for approximately 22.5 adult guests for 2 hours.

**Beer** - The 1.5 glasses per person per hour applies here too. If you purchase a half barrel keg, it will serve one hundred sixty five 12 oz. glasses. This allows for approximately 55 guests.

**Punch** - Standard size punch bowl holds one gallon or approximately 24 servings, using 1 or a little less of a 750 ml bottle of liquor.

**Coffee** - One gallon serves approximately 20 cups of coffee.

### How Many Drinks Per Bottle - Highballs, Cocktails, Mixed Drinks (1.5 oz. liquor servings)

Bottles	1	2	4	6	8	10	12	S e r v i n g s
750 ml (25.4 oz.)	16	33	67	101	135	169	203	
Liter (33.8 oz.)	22	45	90	135	180	225	270	
1.75 L (59.2 oz.)	39	78	157	236	315	394	473	

### How Much Ice Do I Need?

**Cocktail Party** - Allow at least 11 lbs. (5 kg.) of ice cubes per every ten adults to cover your mixed or soda drinks.
